1. Organisation Overview

Brief history: Glow by Bonolo is a small fictional skincare business based in

Johannesburg, started in 2023 by Bonolo Motloun. The business focuses on affordable and natural skincare products mainly for young people.

The idea for this brand came from the founder's personal experience with acne while growing up. Dealing with acne affected her confidence and how she saw herself. Because of this, she wanted to create products that help others feel more comfortable in and confident in their own skin. The business currently works on social media, where it connects with customers and promotes products.

Mission statement: To provide affordable skincare products that help people feel confident in their own skin.

Vision statement: To grow into a well-known skincare brand that young people in south Africa can trust.

Target Audience: Teens (dealing with acne)

Young adults (interested in skincare)

2. Website Goals and objectives

The main goal of the Website is to create a more professional online presence and make it easier for customers to access products.

Goals:

- sell products online
- increase awareness of the brand
- share helpful skincare information

KPI'S:

- Customer engagement on the site
- Number of visitors to the website

- Number of products on the site

3. current website analysis

Glow by Bonolo does not currently have a website and depends on social media. While this helps with communication, it is not always reliable for business growth. Creating a website will make the business look more professional and give customers a better shopping experience.

4. Proposed features and functionality

The website will include:

- A homepage introducing the brand
- An “about” page explaining the story behind the business
- A product page showing items and prices
- A contact page for customer enquiries
- A shopping cart for purchases
- User accounts to track orders

5. Design and User Experience

This website will have a clean feminine and simple design that reflects skincare and selfcare

Design elements:

- Colour palette: soft pink, white, and beige
- Typography: simple and easy to read fonts
- Layout: neat and mobile friendly

User experience:

- Easy navigation
- Fast and simple checkout process

- Clear product display
(low fidelity wireframes will be created to plan the layout)

6. Technical Requirements

- Domain: www.glowbybonolo.co.za
- Hosting: a reliable hosting provider
- Technologies: HTML, CSS, JavaScript

7. Timeline and Milestones

- Week 1: planning
- week 2: Design(wireframes)
- week 3: development
- week 4: testing and launch

8. Budget Estimate

- domain registration: +- R150 annually
- Maintenance: +- R500 annually
- Hosting +- R100 annually
- Development: R20000 Once off
